

THE MIND SWORD™ Instructions

Watch the instruction video at www.TheMindSword.com for more tricks and tips!

** Use the secret password: "Incredible" **

THE SECRET

The Mind Sword™ creates a totally mystifying effect: it glows and moves objects at your command! Here is how it works... To make the sword glow, place the cap on the end of the sword handle as shown, press the "glow button" on the side of the sword handle and wait 4 seconds. The sword will then glow for 4 seconds while you perform a trick and then fade to dark. The secret to moving objects is the invisible thread included in this package (more on this later).

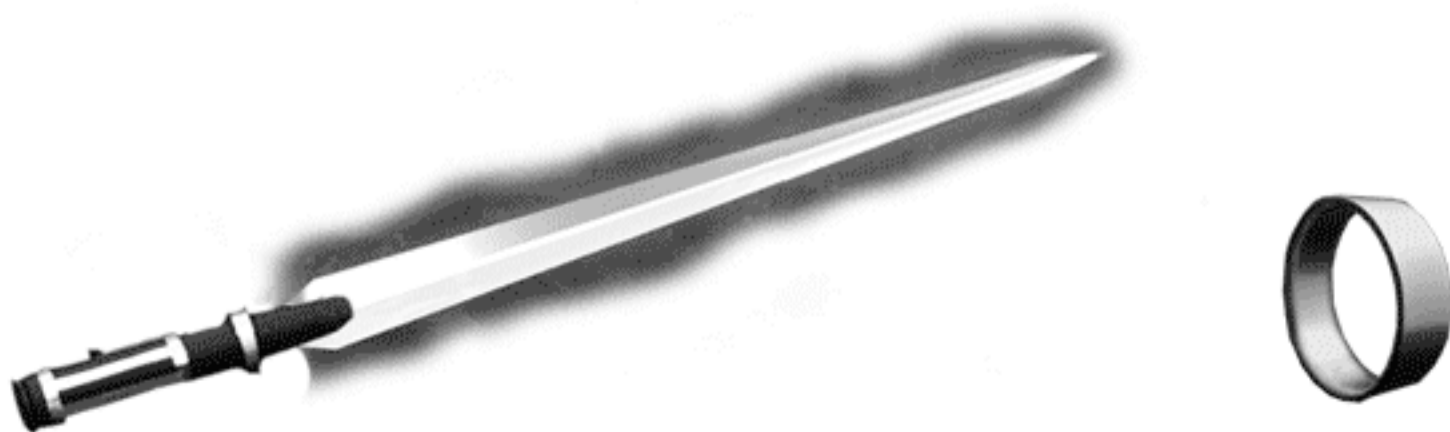

IMPORTANT THINGS TO KNOW BEFORE YOU BEGIN

(1) Take care when handling the fine invisible threads - they break easily.

This package includes 8 sets of invisible thread in case one does break.

(2) Wear dark clothing and perform in dim lighting. This makes the thread harder to see and the glow effect more impressive.

(3) Practice several times in front of a mirror before performing a trick for other people.

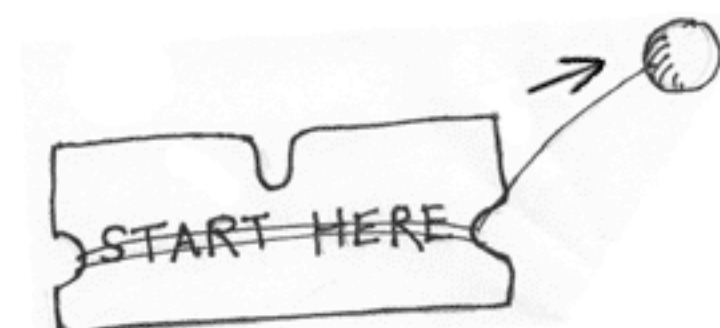

Caution:

1. Do not mix old and new batteries.

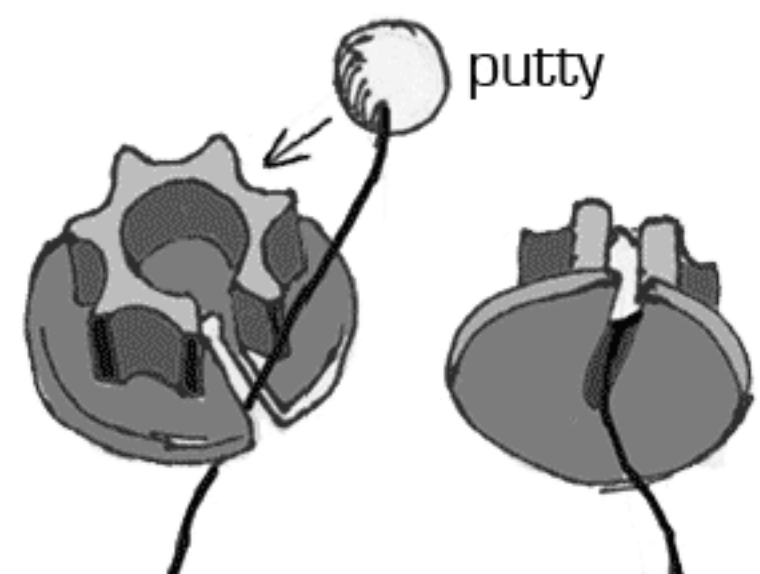

2. Do not mix alkaline, standard (carbon-zinc) or rechargeable (nickel-cadmium) batteries.

HOW TO SET UP THE MIND SWORD™

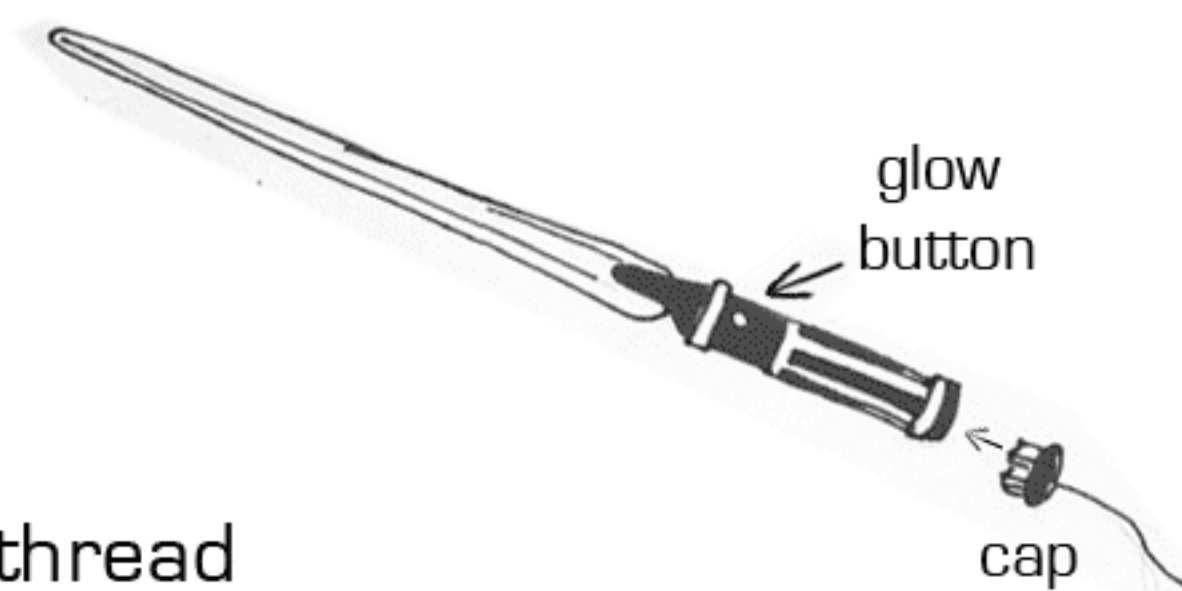

[1] Remove one invisible thread card from the clear box. Gently unstick the putty next to the words “Start Here.” Carefully unwrap the thread from the card. Do not remove the second piece of putty yet.

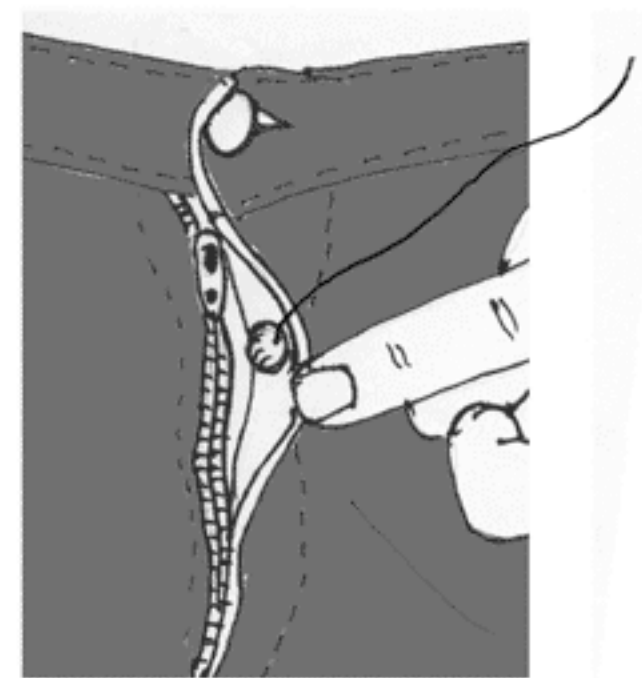

[2] Press the putty inside the small cap as shown. Make sure the thread passes through the slot in the cap as shown.

[3] Press the cap firmly back into the end of the sword as shown. The sword will not glow unless the cap is in place at the bottom of the sword handle.

[4] Detach the second piece of putty from the thread card. Attach the putty to your body near your waist. The best ways to do this are to press the putty onto the back side of a belt or near the zipper of your pants. Be sure the putty is hidden from view. Press the putty very firmly so that it does not fall off. To remove the putty from the cap, pry it out with the tip of the sword.

Your Mind Sword™ is now set up!

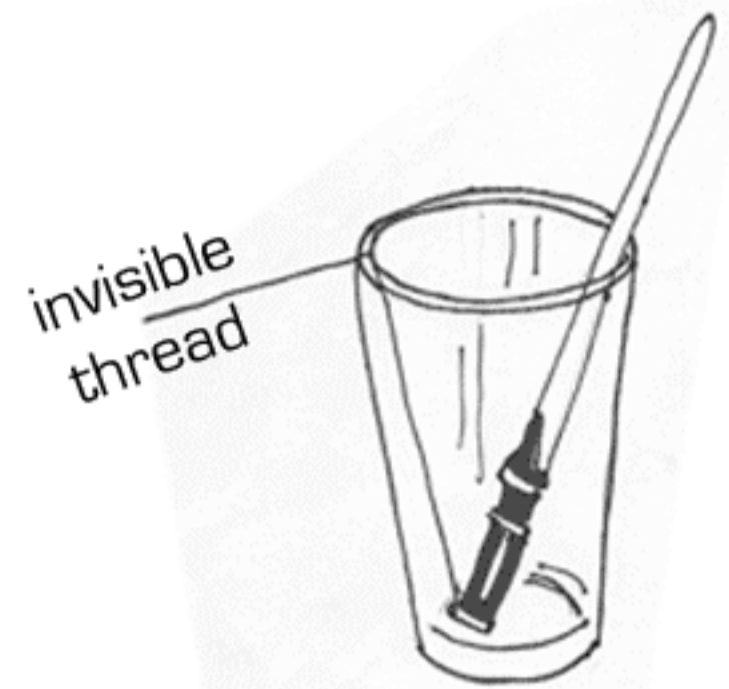

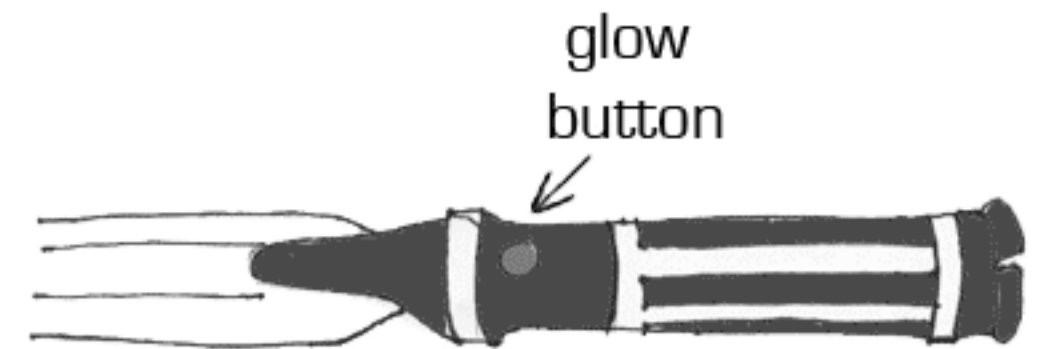

You are ready to begin moving objects with your mind!

THE TRICKS

(1) Levitate the Mind Sword™ out of a glass!

- ◆ Press the glow button on the side of the sword handle, but do not let anyone see you do this. You now have 4 seconds before the glow turns on and you need to begin the trick.
- ◆ Place the Mind Sword™ in a heavy clear drinking glass with the handle end downward as shown. Set the glass on a table in front of you.
- ◆ Hold your hands on either side of the glass without touching it and stare intently at the sword as if concentrating very hard.
- ◆ When the sword begins to glow, slowly move your hips backward slightly so that the invisible thread begins to pull the Mind Sword™ upward out of the glass.
- ◆ As the sword's glow fades, slowly move your hips forward to allow the thread to slacken and the sword to descend back to the bottom of the glass. Act like the sword has fallen because you lost your concentration.
- ◆ TIP: Do not move your hands or head when performing this trick. If you do, your audience may suspect that the sword is attached to some sort of string. No one will notice small, slow movements of your hips.

THE TRICKS (continued)

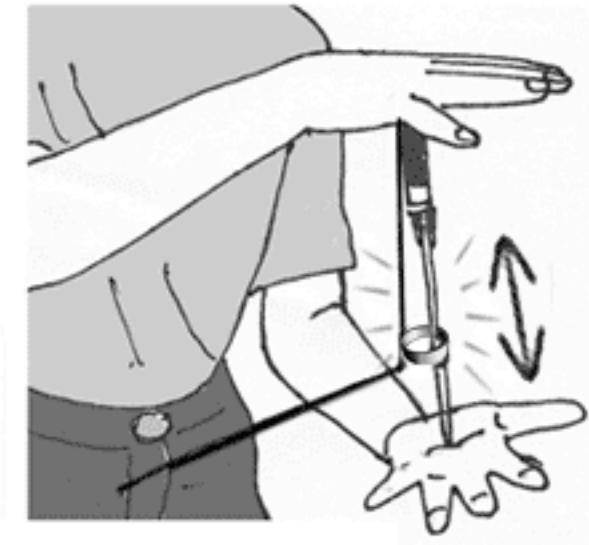

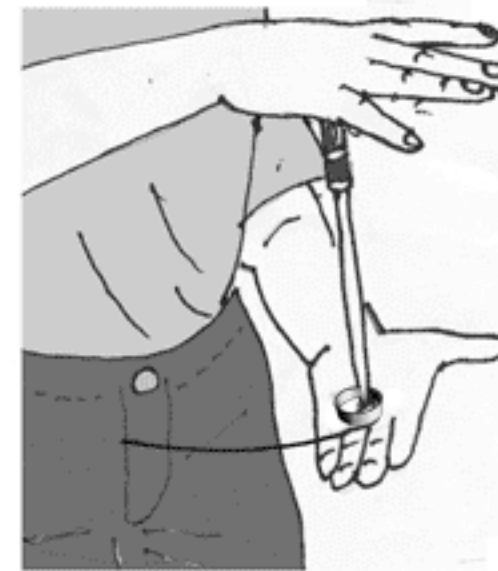

(2) Levitate the Mind Sword™ out of a water bottle!

- ◆ Perform trick #1 with one change: place the sword in an empty plastic water bottle held in your hand. This is a very effective trick!

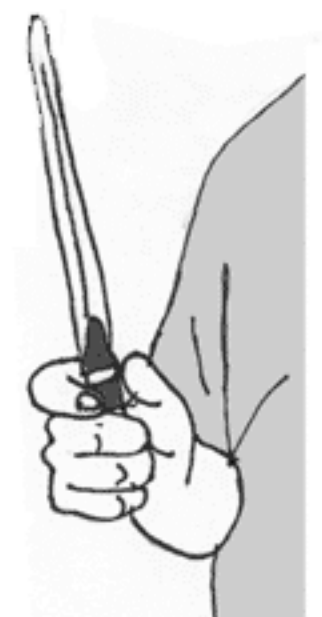

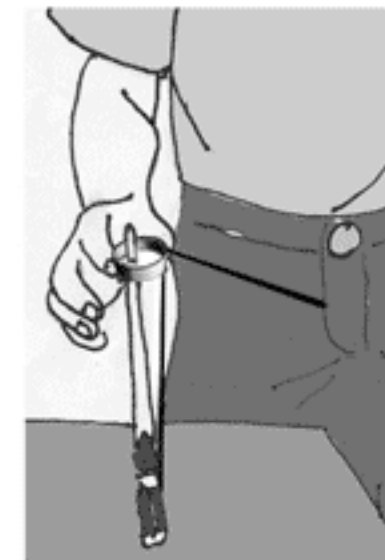

(3) Move the force ring up and down along the Mind Sword™!

- ◆ Slip the force ring over the sword handle end. Secretly press the glow button, then position the sword between your two hands with the sword tip down as shown.
- ◆ As the sword begins to glow, move your hips slightly backward then forward slowly. The ring will mysteriously move up and down the sword! End the trick when the sword's glow fades.

(4) Make the Mind Sword™ rise into your hand!

- ◆ Slide the sword through the force ring handle first as shown. The invisible thread will pass through the ring also.
- ◆ Secretly press the glow button. When the sword begins to glow, move your hips backwards, and the sword will rise up into your hand!
